

# E-commerce Internet Booking Portal

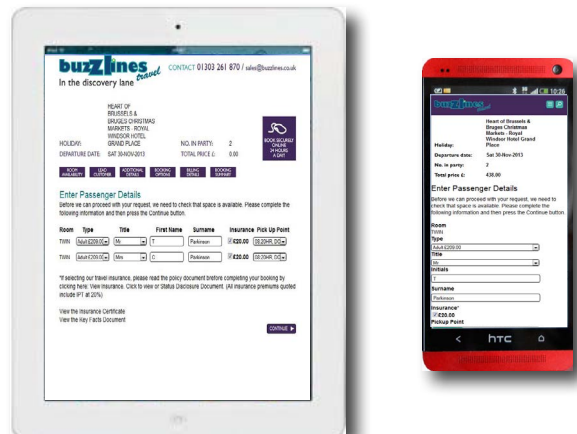

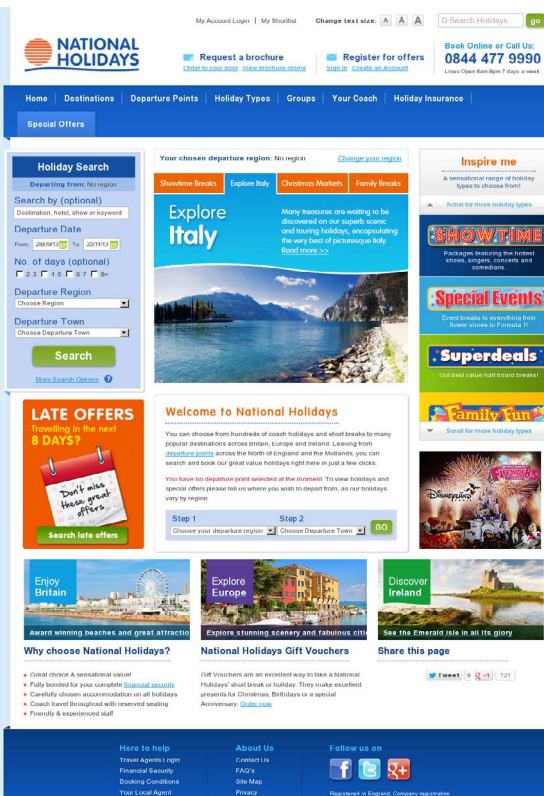

Using state of the art technologies, WebRes is an e-commerce website which seamlessly works with our holiday reservation system to give your customers round the clock access to your tours, excursions and events. In addition to browsing your latest products, customers can make secure bookings and payments plus receive an instant email confirmation of their booking.

Roeville takes care of the complicated and expensive business of hosting a premium performance and highly secure web presence, leaving you free to concentrate on the planning and marketing of your holidays. All you need is a broadband connection into your system and we handle the rest, all for a realistic monthly service charge.

Uploading text and images is an absolute breeze, and you can soon create a complete online representation of your holiday brochure. No web design skills are necessary and WebRes has all the tools you need to manage the site and its content.

We also provide you with marketing\SEO tools to help get your website ranked by the top internet search providers such as Google.

WebRes sites are always up to date and customers and booking agents can easily find the tour of their choice, drill down into the itinerary and check seat availability. We support the latest Responsive Technologies to give mobile and tablet users the best experience when visiting your site.

Booking any holiday, excursion or event is simplicity itself, with clear screens walking the visitor through the booking stages. Whether it be on a PC or a smart device, users are carefully guided through entering their personal details, rooms, departure points and all the other information required for their booking.

WebRes has passed the most stringent PCI security checks, and secure payment screens give visitors confidence and peace of mind. Once the booking is complete, the customer receives an instant confirmation and insurance certificate by email.

WebRes is an extremely flexible E-commerce portal where you fully control the layout and content of your entire website. Starting from a simple base, you can add breadth and depth to suit your exact requirements. The portal has a wide range of 'plug-in' modules available for you use to make your site come alive. It is pre-configured with all the functionality required to get your site up and running, and can be styled by Roeville or your favourite design agency.

## Professionally Hosted by Roeville

Realistically hosting a commercial e-commerce web system requires substantial investment with levels of security and technical skills not normally available to tour operators. Web sites hosted on a normal broadband connected office are crippled by the inherently low up-load speed of broadband. This is the same no matter which service you subscribe to.

To guarantee maximum security, performance and up-time, we host WebRes on our own industrial strength servers located in a secure data centre on the internet backbone. WebRes employs Microsoft SQL databases and development technologies to deliver stunning results while meeting the stringent demands of PCI.

There is an initial fee for WebRes, which includes the building and publishing of your initial website design. This is followed by a fixed monthly rental which incorporates all the ongoing hosting, payment gateway, product updates and technical support, plus a generous amount of bandwidth. Extremely busy sites, or those streaming bulky content, may be liable to excess bandwidth charges.

## System Requirements

- Website - Supplied, hosted and fully managed by Roeville for a fixed monthly rental.

## Reservations Office

- A  $\pounds^{28}$ / $\pounds^3$  Reservation System
- Windows Server or workstation running Internet Information Server 6.0 or above
- Broadband link with static IP address
- Existing card merchant account for funds processing

Windows XP, Windows Vista, Windows 7 or Windows 8, Windows Server 2012, (Supports 32 and 64 bit versions - Business and Professional Editions)
